

FILENAME: tract.census.file.txt.gz

LRECL: 458 (200,458 records)

ABSTRACT: The Census Tract file was created using all the Census tracts found in the Census 1990, Census 2000 and the American Community Survey (ACS) 2008-2012. The ACS is a nationwide survey that produces characteristics of the population and housing, similar to the long-form questionnaire used in Census 2000. The ACS was used in place of the 2010 Census files because detailed demographic, social, economic, and housing data are no longer collected as part of the decennial census. The data that were collected from the long form sample are now produced from the American Community Survey.
